

JANUARY 22, 1973 - JANUARY 22, 2017

THE TRAGEDY OF 44 Years OF LEGAL ABORTION IN AMERICA

"We, the following citizens, pledge our support for all women and their families as they consider options other than abortion. We stand opposed to our nation's 'culture of death' which has claimed over 58 million unborn children through abortion and has left millions of mothers, fathers, and families suffering physical and psychological pain due to their 'choice'.

We support real rights for women... the right to know all the risks involved in abortion, the right to be given accurate fetal development information, and the right to be offered true choices and alternatives. We also support those organizations that treat the mother and the child with the love and respect they both deserve.

If you, or someone you know, is experiencing an unplanned pregnancy

please call 1-800-712-HELP

The Miracle of LIFE!

5 Weeks

Permanent kidneys appear during the fifth week, and the external portions of the ear begin to differentiate. The fifth week will see the embryo more than double in size, growing from approximately 5 millimeters in length (19 inch) to 10 millimeters.

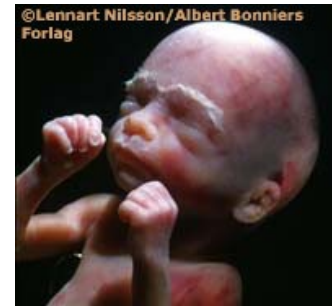

8 Weeks

By the eighth week of pregnancy, every organ is present and in place. The embryonic period is now over. Ninety percent of the structures found in an adult human being can be found in this tiny embryo (now called a fetus) which is only about an inch and a half long. The brain, at this point, accounts for almost half of the body's total weight, and 75% of 8-week fetuses demonstrate right-hand dominance. Intermittent breathing motions (though there is no air present in the uterus) occur.

16 Weeks

Though the fetus has long been in almost perpetual motion, by 16-20 weeks from fertilization, the body is large enough for the mother to start feeling the kicks. Eyelids have now completely covered the eyes, and fine hairs have begun to cover the entire body.

22 Weeks

Where modern medical services exist, twenty-two weeks from fertilization (24-weeks gestational age) is generally considered the beginning of viability outside the womb. At this point in pregnancy (barely half way through a full term) the odds of long-term survival are still relatively slim, but new medical advances continue to increase the likelihood of survival and decrease the age of viability.

The Courageous

"How can we expect righteousness to prevail when there is hardly anyone willing to give himself up individually to a righteous cause? Such a fine, sunny day, and I have to go, but what does my death matter, if through us, thousands of people are awakened and stirred to action?"
- Sophie Scholl (The day of her execution)

Sophie Scholl was born into a Christian family in Forchtenberg on May 9, 1921. Sophie was a German student, who was active in the White Rose – a non-violent resistance group to Hitler and the Nazi party. In 1943, she was caught delivering anti-war propaganda and, with her brother Hans Scholl, was executed for high treason.

Today, when there is little to risk, will you be stirred to action? Will you join with us in standing up and speaking out against the killing of preborn boys and girls? We urge you to join us! For information about Right to Life of North Central Indiana and how you can get involved, call us: (574)306-7406 or visit our website: nci4life.org.
